Catalog #	Wattage	Voltage	Lamp	Ballast
TWLF105277MGLCS	105	277*	CFL	Electronic

The Temporary Work Light fixture with a mogul base is used to protect a 105w Compact Fluorescent Lamp. Available for 277 volt electrical systems, the fixture comes with a hook and a 5' blunt-cut cord. The lamp is self-ballasted, eliminating the need for an additional ballast.

The zinc-plated steel wireguard provides complete protection for the lamp and enables full light distribution. The open-close design allows easy relamping.

FEATURES:

- Guard is zinc-plated steel.
- Mogul base socket.
- Hook, socket and 5' cord included.
- Operates on 277V electrical system.
- 4100K, 7000 lumens
- Lamps are self-ballasted.
(No external ballast required.)
- 10,000 hours life.
- 1 year limited warranty on lamps.
(Breakage in the field not included.)

Mounting:

Die cast aluminum safety hook, in a 3/4" threaded mount.

*120V upon request.
